LIBYAN BANKNOTES CATALOG

Introduction

I prepared this catalog as a simple and easy-to-browse reference for collectors, hobbyists, and anyone interested in the history of Libyan currency. The aim is to bring together and organize information and images relating to Libyan currency issues in one place, making them easier to consult, use, and share within the collecting community.

The information and images relating to Libyan currency included in this catalog have been collected from Otto Collect. I would like to express my sincere appreciation for the valuable information and resources they provide to the collecting community.

I would like to clarify that I do not claim ownership of the original information or images, and that all rights relating to the original content remain with their respective owners and rights holders. I contacted Otto Collect to request permission to publish this material in this catalog, and I received permission by email from Otto Collect to publish the material for this purpose. A copy of the permission email is included at the end of this catalog for reference and documentation.

My contribution to this work is limited to researching, selecting, compiling, organizing, and formatting the information relating to Libyan currency, with the aim of presenting it as a single, convenient reference for collectors and enthusiasts.

The information regarding the signatures of Central Bank governors, included in the final section of this catalog, was not collected or prepared by me. This information has been compiled and circulated among currency collectors, and I have included it here because I believe it may be useful to collectors and researchers interested in studying, comparing, and documenting Libyan currency. I make no claim of ownership or authorship of this information and present it as it was shared with me, with full respect for the collector or collectors who originally compiled and circulated it.
